APPARATUS, DISPLAY CONTROL METHOD, RECORDING MEDIUM, AND
PROGRAM TRANSMISSION APPARATUS**

ABSTRACT

To allow for switching between a normal display and a zoom display by a simple operation, thereby providing both of a large amount of information by high resolution and high visibility of the display. In a computer system having a display apparatus as output unit, an input section 50 for accepting a user operation to issue a request for changing a display zoom factor, a resolution changer 10 for changing the resolution of the display apparatus in response to the request for changing the display zoom factor issued by the input section 50, and a window resizer 20 for resizing a predetermined window displayed on the display screen 70 of the display apparatus so as to be displayed over almost the entire display screen 70 after the resolution is change by the resolution changer 10.
